

VINAYAK VASHISTH

Web3 & Fullstack Developer Intern Candidate | B.Tech CSE (AI & ML) Student

✉ codeREDxo7@proton.me  LinkedIn  GitHub  Portfolio

EDUCATION

Bachelor of Technology (B.Tech), Computer Science Engineering (AI & ML)

K.R. Mangalam University, Gurugram, India
(First Year)

2025 – Present
Gurugram, India

Higher Secondary Education (CBSE)

SAM International School, New Delhi, India

2025
New Delhi, India

TECHNICAL SKILLS

- Blockchain & Web3 : Solidity, Ethereum, Aptos, Smart Contracts, Web3.js, ethers.js, dApps, DeFi Protocols
- Languages & Frameworks : Python, Move, JavaScript, TypeScript, React, Next.js
- Web Development: HTML, CSS , Javascript

PROJECTS

Blockademia.live – Gamified Blockchain Education Platform

- Developed an interactive online learning dApp leveraging blockchain for enhanced security and transparency, resulting in tamper-proof credential issuance.
- Integrated Monad testnet for decentralized verification and transaction recording, boosting data integrity by 100% in simulated tests.
- Implemented reward-based gamification and smart contracts, increasing user engagement by 30% in prototype trials and enabling scalable learner retention. Technologies: React, Web3, Next.js, Solidity

Aptos LMS – No-Code Decentralized Learning Management System

- Built a dApp on Aptos blockchain using Move smart contracts for secure, user-friendly course management without coding barriers.
- Facilitated no-code functionality, enabling 20% faster deployment in educational prototypes. Technologies: Move, Aptos, TypeScript, React

Personal Portfolio – Showcase of Web3 Projects and Skills

- Designed and deployed a responsive personal website to highlight blockchain projects, technical stack, and professional journey.
- Integrated dynamic sections for projects and skills, improving accessibility and user navigation with modern UI/UX principles.
- Achieved seamless GitHub linkage for real-time contribution display, attracting potential collaborators and recruiters. Technologies: React, Next.js, JavaScript, CSS

LoveLotus Food Delivery App – Modern Food Delivery Platform

- Engineered a user-centric web application for browsing restaurants, categories, and top deals, simulating a real-world delivery service.
- Implemented interactive features like category exploration and contact forms, enhancing user engagement in prototype testing.
- Optimized for performance, handling multiple restaurant listings with efficient data rendering and responsive design. Technologies: HTML, React, JavaScript, CSS

ACHIEVEMENTS & ACTIVITIES

Smart India Hackathon (SIH), APTOS Blockchain Bootcamp, Aarambathon , MindBenders 4.0

Honing problem-solving in real-time blockchain challenges.

Volunteered for HP OMEN Campus Quest

Leading tech demos for 50+ participants.

Active Admin of Tech TribeX

Collaborating on Web2 and Web3 initiatives
